DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10/21/2004 has been entered.

Information Disclosure Statement

The examiner has considered the item listed on the Information Disclosure Statement (IDS) filed 10/21/2004. A signed copy of the Form PTO-1449 is enclosed with this office action.

Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the city and either state or foreign country of residence of each inventor: in particular information in this regard for co-inventor Haller is missing. The residence information may be provided on either on an application data sheet or supplemental oath or declaration.

Furthermore, the oath/declaration does not identify the citizenship of each inventor: in particular information in this regard for co-inventor Haller is missing.

REASONS FOR ALLOWANCE

Claims 1-9 and 10-11 are allowed

1. *The following is an examiner's statement of reasons for allowance: a semiconductor memory device with capacitor wherein at least one layer of germanium borophosphosilicate glass has a portion that is in contact with a layer of borophosphosilicate glass has not been found in the prior art. Although semiconductor memory devices with capacitor cell including either borophosphosilicate glass or germanium boro-phosphosilicate glass as materials along roughened interfaces are known (see, e.g., Ando (6,097,053), Sandhu et al (6,249,019 B1), Sandhu et al (6,124,607) as made of record by Applicant through the IDS filed 10/21/2004), within the context of independent claims 1 through 9 a semiconductor memory device wherein a portion of a layer of germanium boro-phosphosilicate glass contacts at least a portion of a layer of boro-phosphosilicate glass has not been found. In this regard it is noted in particular in light of Applicant's filing of aforementioned IDS that while in Sandhu et al*

Art Unit: 2826

(6,249,019 B1) layer 312 comprises germanium borophosphosilicate (col. 6, l. 45-61) the layer in contact therewith is (amorphous, poly-) silicon (col. 7, 21-30), not *borophosphosilicate* glass (BPSG).

Finally, Sandhu (US 2003/0038309 A1; USPAT 6204,196, USPAT 6,040,020) herewith made of record by examiner teach the exploitation of the material differences between BPSG and Ge-BPSG for surface planarization layers (se e.g. section [0020] in US 2003/0038309), not for capacitor sidewall layers. An update search has not revealed pertinent art.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
